Society for the Fight Against Cancer of Ecuador (SOLCA), Guayaquil
Research Committee (CISOL)

Institutional Statement

Guayaquil, _____ _____, 2026

Ref. No. _____

The Research Committee of CISOL, SOLCA Guayaquil, states that, based on the information submitted by the doctoral candidate Servio Fernando Lima Reina (University of Fribourg, Switzerland):

1. The doctoral study "LCHAI" used exclusively public research datasets.
2. No data, clinical records, images or samples from patients of SOLCA Guayaquil were used; the study therefore did not require ethical review of patient data at this institution.
3. Dr. Fuad Huamán, who at the time collaborated with CISOL as an expert consultant, provided morphological advice and a preliminary review of 8 subregions from 5 public TCGA slides.
4. This statement acknowledges that collaboration. It is not a clinical endorsement of the system or of the thesis results, and it does not commit SOLCA to any further activity.

Issued at the request of the candidate, for inclusion as an appendix of the doctoral thesis.
